## **Entering Exam Grades into Genesis**

- 1.) Open the grade book spreadsheet for one of your course sections.
- 2.) In the grade book window, there are tabs which correspond to the marking periods. After MP4, there is an "exams" tab. Click there.

3.) The next screen will have columns for your midterm and final exams. Click on the blue link to "create exam section"

4.) To the left in the row marked Midterm Exam Setup, find the section below:

5.) Click "add new Section to the Midterm Exam." If your exam has multiple components (objective, essay, etc.) you can create a section for each grading area. Once you assign values for the sections, Genesis will sum your grades. The create window will appear. The image below represents a populated window.

- 6.) Enter the values for your exam. Note that you should complete the "Max Possible Score" values to correspond to the scoring model on your test. (If you have 100 multiple choice questions worth one point each, populate with "100.") You do not have to change the values to assist with the grading the percentage component will do this.
- 7.) Press OK. Repeat step 5 for each of your exam sections. Note that Genesis will not accept percentages with decimal points. The "Sequence" box will order your exam sections.
- 8.) The section to the right will now look like:
